DSI: Unix Shell, Git and GitHub
Assignment 3: Inequity and Ethics

Requirements:
1. Reflect on a past project that lacked an ethics and inequity component (minimum 1 page). What would you change about your project? What discussion should you add?
2. Include at least 3 primary and/or secondary resources

Lesson Outcomes:
- Reflect on inequities and inequalities in relation to data science work
- Better understand the people and communities that are omitted and how that might continue to marginalize already marginalized people and communities

Rubric:

Component	1	2	3	4	5
1. Thorough discussion of additional ethical component to past project					
2. Included at least 3 resources which have all been properly cited					
Total:					/10
